Guiding patients toward safe home discharge

Enhancing Safer Patients Journey Through Simulation

Objectives:
- To introduce the concept of CRM, TeamSTEPPS
- To demonstrate sustained improvement in quality and patient care among healthcare providers
- To ensure the right management plan will reach the right patient at the right time
- To create strategies to clarify leadership and followership roles
- To utilize evidence-based communication tools to enhance patient safety

Target Audience:
- Healthcare providers who are interested in improving patient safety experience
- Patient safety soldiers, Quality unit and taskforce.
- Healthcare educators and administrators
- Other healthcare professionals: (ER, ICU, in patient wards, radiology, clinical pharmacy, OR healthcare providers)

Join us in this real-time life experience of handling critically ill patients during crisis
