

- Abstracts must be submitted in English
- Abstracts must not exceed 400 words (one table or figure is allowed)

Abstract Title:

1) Problem

What was the problem? How did you know it was a problem? Who was being impacted by the problem?

2) Background and aim

Describe the institution, department or community where the work was done. Describe the team involved and the client/patient group that is the focus of your work. What is more widely known about this problem? Write the aim of the study?

3) Methods

Explain how you designed your intervention. Describe the process, quality improvement methods and tools used including process and outcome measures. Explain how you collected the data and who was the target of that collection.

4) Results

Provide a summary of the data that you have collated.

5) Conclusion/Lessons learned

Summarise the outcomes of your work. Outline the impact for patients and for the health system as a whole. Identify lessons learned and how the project results will be sustained and outline directions for future research.

Deadline for late breaking abstract submission is on the midnight of **March 24, 2019.**

All submitted abstracts should follow the above-mentioned configuration and should be submitted via the Via "SUBMIT YOUR ABSTRACT" available at: <https://patientsafety.ksau-hs.edu.sa/>
